MEMO TO FILE:

Re: Hydro-Jet Services, Inc.  
Secs. 16 & 21, T. 35 S., R. 11 E.  
Garfield County, Utah

ACT/017/001

On Thursday January 6, 1977, Mr. M.H. Montgomery and Dr. J. Olsen met with Brian Buck and Ron Daniels in the Division office to discuss what engineering analysis needed to be done for the Hydro-Jet tailings facility in Shitamaring Canyon.

Basically, Dr. Olsen agreed with the necessity for the six (6) items listed in the field memo of October 12, 1976. He said that he is waiting for dimensions of the facility in question and that he will make a field inspection of the site when he has received that information.

Mr. Montgomery said that he will be consulting Hydro-Jet in designing future modifications to the facility and that Mr. A. Richards will help with the hydrologic and meteorologic questions involved in the run-off problem with the facility.

Brian said he would send Mr. Montgomery and Dr. Olsen copies of the complete operating license and NRC regulations regarding this dam when the documents arrive.

DIVISION OF OIL, GAS, AND MINING

Brian W. Buck  
Engineering Geologist
